

Introducing

ersaSpa™ age-defying sunless tanning and MORE

Imagine...One system fulfilling diverse needs that are desirable and always in season... Where spa-like treatments spur heightened experiences... Where flawless quality and comfort meet. **Imagine...**One system that evokes the skin's youthfulness – soft, smooth, supple, where skin is quickly fortified and moisturized, bronzed, hydrated, beautiful.

Imagine... Wonder... Believe...

MagicTan™ introduces VersaSpa™ the world's first **Patent-Pending** HVLP automatic skin treatment spa, that combines healthy skin therapies with state-of-the-art comfort technologies, offering you **MORE** value per square foot and your clientele **MORE** comfort and choices than ever before.

With an open design, no lingering mist and built-in blow dryer, customers can now feel Relaxed, Comfortable, Warm & Dry before, during, and after their MagicTan™ Experience.

Great results – quietly

MagicTan™ sets new standards as the first to present automated high volume, low pressure or (HVLP) turbine technology. A highly efficient air delivery process that moves air at an accelerated speed through our proprietary mist nozzles. This advantage allows clients to enjoy:

- Greater, more efficient, coverage
- Absorption without lingering mist
- Deeper, longer lasting results

Unlike other automatic booths which rely on an air compressor, the VersaSpa's™ HVLP turbine is stored inside the spray column. This saves valuable space in your Salon, while also eliminating excess noise.

the experience matters.
